# GeoBasis

The screenshot displays the GeoBasis web application interface. At the top, the browser window shows the URL: `win7nl/SilverlightViewer_1.5/Viewer.html?ViewerConfig=http://win7nl/Geocortex/Essentials/REST/sites/GeoBasis/viewers/GeoBasis/virtualdirectory/Config/Viewer.xml`. The application header features the **GEOWEB** logo and a search bar with the text "Zoeken op de kaart...".

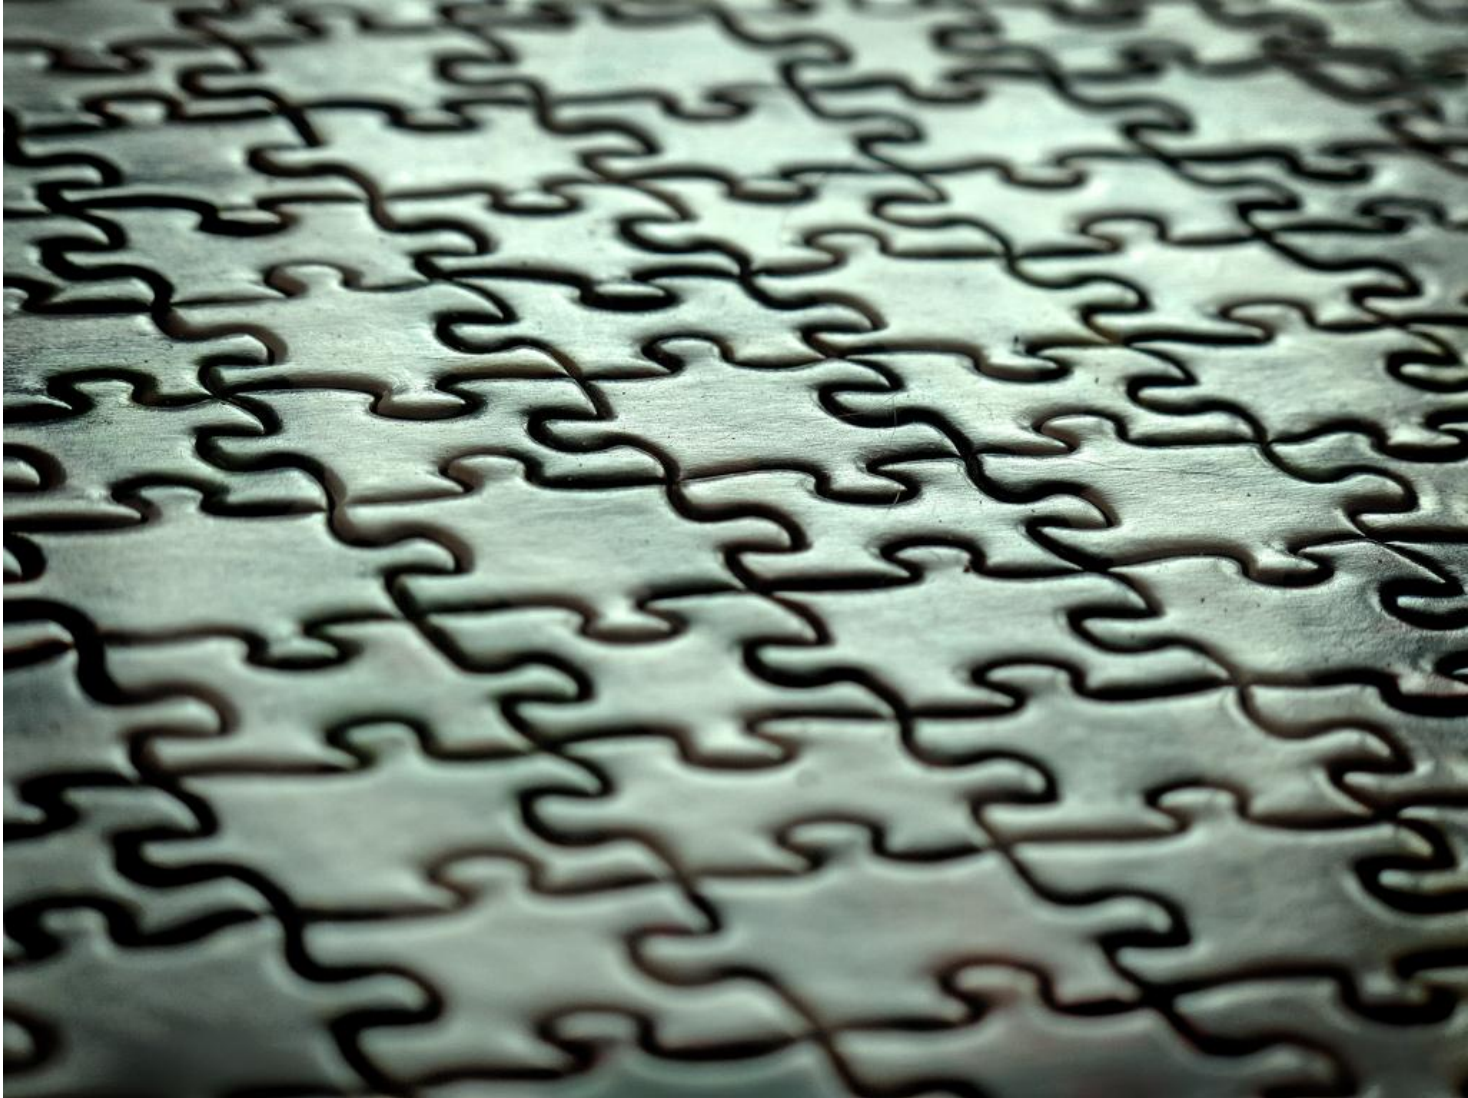

The main interface includes a navigation menu with categories: Navigeren, Kaarten & Informatie, Taken, Analyse, Zoeken, and Brondocumenten. Below this, there are several search and filter icons, including: Straatnaam en Huisnummer, Postcode (en Huisnummer), Verb/Obj- SP- LP-Identificatie, Pand-Identificatie, Kadastrale Rechthebbende, Perceelsidentificatie, WOZ-plichtige, WOZ-nummer, Wijk, Buurt, Zoek op Vestiging, Zoek op ingeschreven persoon, Zoek BAG..., Zoek Kadastraal..., Zoek WOZ..., Zoek Wijken of Buurten..., and Zoek subjecten...

The central area shows a cadastral map with orange-colored buildings. A search results panel on the left displays "Resultaten (1)" and "Toon geselecteerd >>". The result is: "Adresseerbaar Object + FOTO", with BAG-Id: 017501000003990 and Adres: Prinses Julianastraat 10 te Ommen.

An inset window titled "Adresseerbaar Object + FOTO" shows a photograph of a house. Below the photo are the options "Verwijder uit selectie" and "Toon aanvullende details".

At the bottom left, there is a scale bar showing 200 ft and 50 m, and a small "EN" language indicator.
